- Proprietary formula kills fleas, ticks, flea eggs and larvae
- Prevents fleas and ticks from developing into egg-laying adults
- Contains NyGuard Insect Growth Regulator
- Uses patented odor neutralizing technology that eliminates pet odors, including urine
- Leaves fresh, clean scent
- Continuous flea protection for seven months
- Uses innovative spray nozzle for no-drip application
- For use in residential and commercial sites
- Treats up to 2,000 square feet

Product Specifications

Signal Word	Caution
Packaging	12 x 17 oz. aerosols per case
EPA Registration Number	1021-2580
Food Handling	Not for use in food handling areas
Stability of Undiluted Product	Not Applicable – aerosol
Stability of Diluted Product	Not Applicable – aerosol
Appearance	Milky, white liquid (concentrate in can)
Odor	Fresh, clean scent
Active Ingredients	Sumithrin, MGK 264, Pyriproxyfen
Flammability	Contents under pressure
Mode of Action	Sodium channel inhibitor – disrupts insects' nervous system Juvenile hormone mimic
Class of Chemistry	Pyrethroid, Insect Growth Regulator (IGR), synergist
Respirator Required	Not required
Mix or Dilute in	Not applicable – ready-to-use aerosol
Activity	Contact kill, residual activity
Shelf Life	3 years or more if stored at room temperature

Use Areas

For indoor use only

Homes
Hotels
Offices
Hospitals
Apartments
Schools
Dorms
Warehouses
Veterinary clinics
Commercial buildings

Where Fleas and Ticks Hide

Carpet
Furniture
Floors

Not For Use on Humans or Animals

Method of Application

- Aerosol spray
- Spot treatment
- Surface spray
- Crack and crevice spray

Best Practices when using NyGuard Plus Flea & Tick Premise Spray

For best results before any carpet/surface treatment, vacuum thoroughly before spraying and immediately dispose of vacuum bag in outside trash. To test for staining before treatment, SHAKE WELL and make a test application to surfaces to be treated in an inconspicuous place.

Fleas & Ticks:

Hold can 2 or 3 feet from surfaces to be treated. Turn container upside down and point valve toward surface to be sprayed. Be sure to apply uniformly using a sweeping motion to carpets, rugs, flooring, floors, drapes and all surfaces of upholstered furniture including under cushions. Avoid over wetting furniture and carpeting. A fine mist or spray applied uniformly is all that is necessary to kill fleas and ticks. Be sure to treat pet bedding, as this is a primary breeding site for fleas. No need to remove pet bedding after treatment. DO NOT TREAT PETS. Use a registered flea control product on your pets in conjunction with this treatment.

Use NyGuard Plus as part of an IPM program

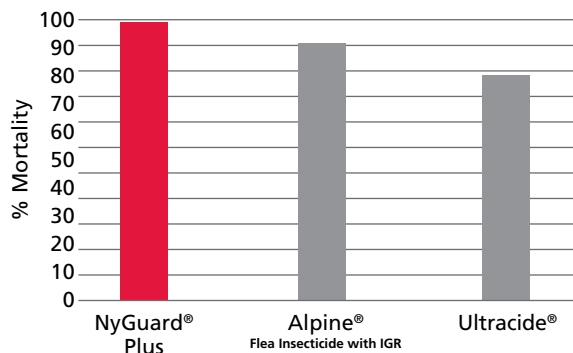

For best results, use NyGuard Plus as part of an integrated pest management program to control the targeted pest.

Key Target Pests Controlled

Fleas & Ticks
Cockroaches
Dust Mites
Carpet Beetles
Lice

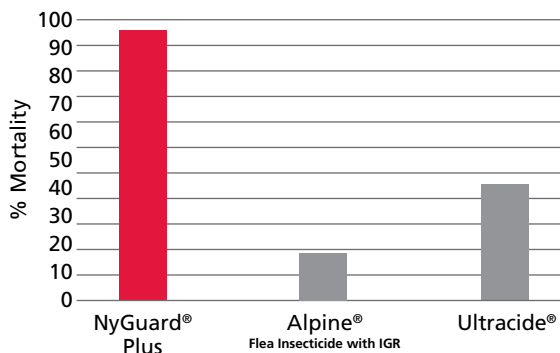

Residual Efficacy Post 14 Days Treatment

Cat Flea – *Ctenocephalides felis*
24 hours after exposure to carpet

Residual Efficacy Post 14 Days Treatment

Brown Dog Ticks – *Rhipicephalus sanguineus*
24 hours after exposure to carpet

Always read and follow label and MSDS directions.
