

# DrainMaintainer™

**“Maintain Your Drain” With Our Advanced Drain Conditioning Basket System**

TOP VIEW  
Basket With Chunks

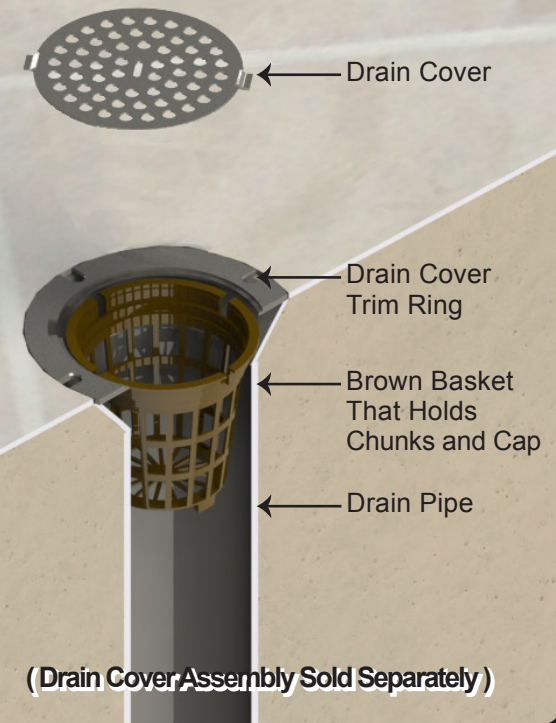

Includes: Basket, Bacterial Chunks and liquid cap holder

**Our floor drain basket system is simple and easy to use.**

- 1) When floor is washed, liquid runs into drain and on top of bacterial chunks in basket.
- 2) Liquid flows through top of chunks and fills cap in bottom of basket, making chunks soft.
- 3) Bacterial chunks starts to release the five strains of bacteria into the floor drain pipe and will continuously work to keep drain clean.
- 4) No maintenance is required; just drop basket into drain. After bacterial compound chunks has fully dissipated, dispose of basket in garbage, and replace with a new individually wrapped DrainMaintainer basket.

Note: Our slow-releasing liquid-activated bacterial compound chunks will breakdown fats, oils, and grease that can clog your drains. The bacterial chunks will also eliminate any fruit fly breeding and drain odors. Product comes complete and ready to use and will last up to 30 days. Product is eco-friendly and contains no pesticides.
