

# Ready-to-Use **InVade**™ Citrus Scent bio zap

## Eliminates Organic Odors and Waste at the Source

### Directions for Use

InVade Bio Zap contains natural, non-pathogenic microbes that eliminate organic odors and wastes at the source. Natural citrus oil provides a fresh scent. Apply by spraying at full strength normally. InVade Bio Zap may be diluted with 1 to 2 parts water for spraying in an ongoing maintenance program. Spray walls, floors, carpets and fabrics where pet, smoke, dead animal or excrement odors originate, just to the point of wetness. Treatment in this manner can also help reduce allergen loads from pets or heavy roach infestations. Always check a small area for color-fastness before use. Rinse garbage receptacles with water and then spray product liberally onto surfaces. Spray surfaces and/or dirt in crawlspaces, basements, garages and other areas where mold, mildew, sewage or wildlife have left odors. Apply 4 oz per drain weekly for drain fly problems, slow drains and odors. Spray into cracks and crevices, and on bathroom walls, sinks, floors and urinals to eliminate organic build-up that can cause odors, support roach populations or harbor fly larvae. Do not apply to food preparation surfaces or food storage areas.

**CAUTION:** Keep out of reach of children. May be harmful if swallowed - seek medical attention and do not induce vomiting. Avoid contact with skin and eyes. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for persistent irritation. Store in a closed, appropriately labeled container between 35 and 90 °F.
