

BONIDE MOLEMAX® MOLE & VOLE REPELLENT

Effectively rids lawn, gardens and plantings of Moles, Voles, Gophers, Armadillos, Skunks, Rabbits, Ground Squirrels and other burrowing animals.

MoleMax® Mole & Vole Repellent is an effective means of repelling burrowing animals from desirable turf and ornamental planting areas. This product can be safely used around children and pets, when used as directed. **MoleMax® Mole & Vole Repellent** is biodegradable and will not harm lawns, gardens, flowerbeds or other desirable plants.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that this product and its ingredients qualify for exemption from registration under FIFRA.

DIRECTIONS FOR USE

How to Use: Remove the protective liner from the inside of the shaker cap, and then apply 1 pound per 500 sq. ft. Lightly watering in the granules after application speeds up the release of material and its penetration into the soil, or you can choose to simply wait for the next rainfall. After application, mole, vole & gopher activity may increase, as they leave the treated area. Reapply if you see new activity in mounds and tunnels.

USING A SPREADER

To apply this product with a spreader, consult spreader setting instructions for your particular spreader. If uncertain about proper spreader setting, begin at the lowest setting that allows the product to flow evenly through the spreader, and apply 1 pound of product per 500 sq. ft., going over the area to be treated, twice if necessary.

USE WHEN PLANTING

For Bulbs: After placing bulb in hole, apply one (1) tablespoon of product into the hole, making sure granules surround the bulb, then backfill with soil. When planting **ornamental flowers** and **shrubs** such as: Roses, Azaleas, Rhododendrons, Mums, etc., apply two (2) tablespoons to the bottom of the planting hole and three (3) to four (4) tablespoons to the soil mix before back filling.
