### PRECAUTIONARY STATEMENTS:

Keep out of reach of children. **FIRST AID:** Wash skin after use. Avoid contact with eyes or cuts. If in eyes, flush with water 15-20 minutes, if irritation persists, seek immediate medical attention for treatment. **STORAGE:** Store in original sealed container. Store at room temperature. Store away from direct sun light or excessive heat. Do not contaminate water by storage or disposal. Do not apply directly to water. Not for use on food or feed crops. **DISPOSAL:** Do not reuse empty container. Dispose of properly as required by law. Buyer assumes all responsibility for safety & use not in accordance with directions.

Nature's Mace represents that this product is exempt from EPA Registration under Section 25(b) of FIFRA and has not been registered by the EPA.

**MADE IN USA**

## Nature's Mace Professional Insect Repellent

Our Skeeter Mace® has now gone Professional using essential oils which allow uses for a variety of different applications. It works to repel & eliminate bug infestation and is safe to use on all types of vegetation when used as directed.

### GENERAL APPLICATION:

**Apply** directly to lawns, shrubs, trees, landscaping areas, exterior structures, along water edges, where insects are heavily present.

**Target** larvae (*mosquito, spiders, ants*) by applying to low-level vegetation.

**Cover** entire area & slightly overlap. We suggest you wait 5 mins. after spraying before treated areas can be used.

**Repeat** in 5-10 days.

**Re-apply** every 30-40 days for ongoing prevention.

Do not spray during heavy wind or if heavy rain is expected. Apply in the early morning or evening, before or after peak sun hours, to avoid rapid evaporation.

- **CRAWLING INSECTS:** Spray directly on soil and mounds where insects are living.
- **FLIES:** Spray in stalls of livestock, areas where animals are grazing to lower fly population.
- **TICKS, CHIGGERS:** Generally found in any tall grass, low-to-the-ground shrubs or wooded areas & plants.
- **NO-SEE-UMS:** Peak seasons are March and April.
- **JAPANESE BEETLES** Early summer, adults appear from the ground. Peak activity from late June thru Aug-Sept.
- **PALMETTO BUGS, ROACHES:** Found in moist, humid areas. Outdoors around septic tanks, trash bins, and in mulched gardens, leaf litter, and trees.
- **STINK BUGS** are agricultural pests and found in orchards, farms & gardens. In residential areas, stink bugs can be found in parks and residential landscapes. Spray directly on plants, especially under leaves.
