PRECAUTIONARY STATEMENTS:
FIRST AID: Wash skin after use. Avoid contact with eyes or cuts by wearing eye and glove protection. Use only outdoors or in a well-ventilated area. If in eyes, flush with water 15-20 minutes. If irritation persists, seek medical attention for treatment. **STORAGE:** Store in original sealed container. Store at room temperature away from direct sunlight or excessive heat. Do not contaminate water, food, or feed by storage or disposal. **DISPOSAL:** Do not reuse empty container. Dispose of properly as required by law. Buyer assumes all responsibility for safety and use not in accordance with directions.

Nature's Mace represents that this product is exempt from EPA Registration under Section 25(b) of FIFRA and has not been registered by the EPA.

MADE IN USA

Nature's Mace Professional Deer Repellent

NM Professional Ready-to-Use Liquids are direct contact repellents. They are perfect for keeping deer away from specific landscape/flower beds that are along sidewalks and driveways.

MIX THOROUGHLY AT RATE OF 16 PARTS WATER TO 1 PART PRODUCT

GENERAL APPLICATION: Apply directly onto plants, shrubs, trees and other landscaped areas. Not for use on food or feed crops. Do not apply directly to water. Avoid spraying in the mornings or after rain or irrigation if moisture is present on the plants. We recommend not spraying in high winds. Repeat in 15-20 days. For ongoing prevention, re-apply 30 to 45 days.

FOR TREE FARMS: Apply directly to the lower branches and leaves on the first row of tree leaves and limbs. Apply to the soil under the trees and out to 5 feet past the drip lines. Repeat in 15-20 days.

GROWERS & NURSERIES: Apply directly on the first four (4) rows of low growing plants & ornamentals. Spray a 5 foot (5') barrier on the soil along the edge of the protected areas. Repeat in 15-20 days.

While NM Professional Liquid Deer Repellent does not wash off easily in rain or regular irrigation, it should be re-applied immediately following periods of heavy downpour or consistent rainfall.

For questions, contact our Professional Division for technical support at naturesmaceprofessional.com

NM Professional LIQUID DEER REPELLENT CONCENTRATE

USE IN ALL SEASONS

Peak application times occur during early spring/summer; and in dry zones where irrigation is used. Apply as a preventative to protect spring seedlings, and sprouts before blooms start. For the fall season: protect flowers by spraying along drip lines. In winter, diets change to evergreens and ornamental shrubs. Apply directly on to plants & bushes for added protection.
