BACK FACING LABEL

Nature's Mace Professional Insect Repellent

NM Professional Ready-to-Use Liquids are direct contact repellents. It is an effective and easy solution for repelling and controlling outdoor insects in areas around structures, gardens, lawns, outdoor seating and play areas.

MIX THOROUGHLY AT RATE OF 20 PARTS WATER TO 1 PART PRODUCT

GENERAL APPLICATION: Apply directly to lawns, shrubs, trees, landscaping areas, exterior structures, along water edges, where insects are heavily present. Not for use on food or feed crops. Do not apply directly to water.

Target larvae (mosquito, spiders, ants) by applying to low-level vegetation.

Cover entire area & slightly overlap. Keep people and pets out of treated areas until dry.

Repeat in 5-10 days.

Re-apply every 30-40 days for ongoing prevention. Do not spray during heavy wind or if heavy rain is expected. Apply in the early morning or evening, before or after peak sun hours, to avoid rapid evaporation.

- **CRAWLING INSECTS:** Spray directly on soil and mounds where insects are living.
- **FLIES:** Spray in stalls of livestock, areas where animals are grazing to lower fly population.
- **TICKS, CHIGGERS:** Generally found in any tall grass, low-to-the-ground shrubs or wooded areas and plants.
- **NO-SEE-UMS:** Peak seasons are March and April.
- **JAPANESE BEETLES** Early summer, adults appear from the ground. Peak activity from late June thru Aug-Sept.
- **PALMETTO BUGS, ROACHES:** Found in moist, humid areas. Outdoors around septic tanks, trash bins, and in mulched gardens, leaf litter, and trees.
- **STINK BUGS** are agricultural pests and found in orchards, farms & gardens. In residential areas, stink bugs can be found in parks and residential landscapes. Spray directly on plants, especially under leaves.
