Foreign Grain Beetles. Hold container upright with nozzle away from you. Press valve down and spray as directed. To avoid possible staining of fabrics or surfaces, do not spray at close range. Calculate the cubic feet of the area to be treated. Close all doors and windows. Pointing nozzle upward, direct the aerosol mist to all parts of the room, especially around windows and other light sources that attract these insects. Apply spray continuously at rate of one second per 1000 cubic feet of space. Keep area closed for fifteen minutes after each treatment. Do not remain in treated

area. Ventilate room when treatment is completed. Sweep up and destroy fallen insects. Repeat treatment as necessary. Area treatments can be made when animals are in lounging barns or holding pens.

Out of Doors: For temporary protection of mosquitoes and flies, spray along ground and around bushes and tress. Do not spray ornamental shrubbery. Frequent repeated applications may be necessary.

MUD DAUBER AND WASP NESTS: Spray aerosol directly on insects and their nests from approximately 2 feet distance. Applications should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places contacting as many insects as possible. Repeat treatments as necessary.

CHOCOLATE MOTHS, CARPET BEETLES, DRUG STORE BEETLES IN EXPOSED ADULT LARVAE STAGES: Contact as many insects as possible when treating infested areas such as cracks, crevices, packaged store products, machinery, and dark secluded areas. Spray 10 to 20 seconds per 100 feet of floor space. Repeat weekly or as insects appear.

FLEAS IN BUILDINGS: Close windows and doors. Hold aerosol 36" above floor and direct fog toward floor and lower walls at a rate of 10 seconds per 100 square feet, making sure that all floor, sofa, and chair surfaces are contacted. Remove and destroy pet's old bedding. Thoroughly treat area and allow to dry before replacing. Repeat as necessary. Also treat dogs and cats with a registered flea control product before allowing them to enter treated area.

ROACHES, SPIDERS, WATERBUGS, ANTS, SILVERFISH, CRICKETS: Hold aerosol close to cracks and fog directly into them, contacting as many insects as possible. Apply freely to all possible hiding places behind baseboards, sinks, cabinets, coffee makers, meter boxes, and mapholes. Repeat all treatments as necessary.
