STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal of this product.

Storage: Store product in original container in a cool dry place out of reach of children. Do not allow product to freeze.

Disposal: If empty: Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Notice: Buyer and user assume all the risk and liability of use, storage and/ or handling of this product not in accordance with terms of this label.

Do not contaminate feed or foodstuffs.

Place baits in areas inaccessible to children and pets. Gourmet Ant Bait Gel Bait may be used in "Ant Café" or other similar bait stations.

For use in and around homes, apartments, condominiums, schools, hospitals, restaurants, grocery stores, food processing plants, boats, cruise ships, institutional and commercial buildings, nursing homes, hotels and warehouses.

(OPEN PLACEMENT METHOD NOT TO BE USED IN CALIFORNIA)

To use Gourmet Ant Bait Gel for the control of ants, make long thin lines in areas where ants are a problem. Use 1-3 lines for each placement. Place baits where ants are trailing or have been seen. Place bait under food cabinets, sinks, stoves, refrigerators, food storage areas, attics, garages, basements, storage areas, closets, etc. Place on exterior windowsills and in doorways to help prevent entry of ants.

Wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/ cleaners etc.

Remove as many competing food sources as practical. Ants are attracted to and will feed on Gourmet Ant Bait Gel until they die. The ants will return to their nests after consuming the bait and will feed their young and the queen destroying the colony. Repeat placement of the bait until satisfactory control has been achieved.

Do not use sprays, foggers or any strong chemicals or cleaners near the bait containers or placements. This may contaminate the bait and cause the insects to cease feeding
