DISPOSAL: Wrap container and place in trash collection.

Buyer assumes all risk for use of this product when not used in accordance with directions or established safe practices. Intentional misuse of aerosol products by inhaling concentrated vapors may be harmful or fatal.

Bonide Pruning Sealer is a protective dressing compound to be used after pruning, grafting, for torn bark or other damage. It sets quickly and seals the wound. This product can be used in any season to seal wounds of fruit trees, ornamental trees, shrubs and roses. Product may also be used to waterproof wooden tubs, planting pots, etc.

DIRECTIONS: Shake well before using. Remove protective cap, hold container upright, about 10 - 12 inches away from area to be sprayed. Be sure spray opening is pointed away before depressing valve. Spray generously to assure heavy coating and complete seal. Avoid contact with fences, buildings, etc., as material will stain surfaces. Clean nozzle after each use by turning container upside down and briefly pressing valve. Should stoppage occur, remove nozzle button and clean with kerosene.
