

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS AND DIRECTIONS.

BONIDE Pruning Sealer is a fast, easy and effective dressing designed to aid healing of pruning cuts, grafts and wounds on trees and shrubs, including roses and fruit trees. It provides a protective coating to prevent the entry of moisture and the excessive flow of sap. It can also be used for waterproofing various planting pots and tubs as well as other items used in the garden. Always replace cap tightly to prevent drying out. Spills can be cleaned up with turpentine or mineral spirits.

CAUTION: KEEP AWAY FROM HEAT OR OPEN FLAME. USE IN WELL VENTILATED AREAS. May be harmful if swallowed. Avoid contact with eyes and skin. In case of contact flush eyes with fresh water for at least fifteen minutes; for skin, wash with white mineral oil, wipe off excess and then wash with soap and water. Get medical attention if irritation persists.

DIRECTIONS FOR USE

ROSES AND ORNAMENTAL SHRUBS, FRUIT AND SHADE TREES: Cut away decayed or dead wood, back to sound wood. Apply sealer to all cuts over ½ inch in diameter immediately after pruning cuts are made or when grafting is complete. Use the built-in applicator top to brush on a protective layer of material.

WOUNDS AND ABRASIONS: Trim wound area and treat. Use the built-in applicator top to brush on a protective layer of material.

WATERPROOFING: To waterproof and seal planting tubs, pots, etc. make two (2) applications allowing the first to dry completely before making a second application.

NOTICE: Buyer assumes all risk for safety and use not in accordance with directions.
