# For All Season Use **GOPHER** Granular Repellent

## Repels & Relocates Pocket Gophers, Chipmunks & Ground Squirrels

*Pocket Gophers are active throughout the year and do not hibernate.  
Peak times for mound-building activity begin in spring and  
continue through fall.*

**Non-Toxic ~ Won't harm people, pets or plants**  
**Trains avoidance to treated areas in all weather**

Nature's Mace represents that this product is exempt from EPA Registration under Section 25(b) of FIFRA and has not been registered by the EPA.

**HOW TO APPLY:** DETERMINE dimensions of the affected area. Additionally, include mounds and plant damage infested areas in determining coverage. **Coverage is 625 sq ft per lb.** (13,700 sq ft for whole bag of NM Pro Gopher 22lb Repellent. **DAY 1 and DAY 14: Apply as directed in Steps below. Be sure to Water in after applying for approx. 20 minutes in Step 1 & 2.**

**STEP 1:** Apply NM Professional Gopher Repellent with a Broadcast Spreader. 65% Open (22 on a Lesco Spreader ~ refer to your spreader for calibration). Spread over entire area of lawn where gopher damage has occurred. Spread it 30 feet around or beyond. Water the treated area for approx. 20 minutes.

**STEP 2:** Go to specific beds & plantings where the gopher damage is visible and apply a second covering. Apply liberally a 24" wide band around plantings/beds that are affected by gopher damage. Water the treated area for approx. 20 minutes.

**STEP 3:** After locating the mounds (both open or plugged), apply a small handful (3oz or 1/8 of a scoop) into each mound. Access tunnels by opening plugged mounds. Refill with soil. REPEAT STEPS 1 through 3 every 30 DAYS as needed.
