

NO PRE-MIXING!

Pour concentrate; Set metering dial; Spray. Unused chemical can be returned to the original container.

SPRAYER SETTINGS:

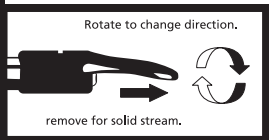

Dial to select 1 through 7 or 10 tablespoons or teaspoons of chemical per gallon of water. The desired setting should align with the setting indicator. Depending on the ratio, sprayer can spray up to 100 gallons.

TABLESPOONS: The sprayer comes ready to use for tablespoon settings.

TEASPOONS: For teaspoon settings, the brass screw on the top of the mixing head must be removed and inserted into the top of the siphon tube inside the bottle.

DEFLECTOR: The deflector can be rotated to change the direction of the spray. It can be removed for solid stream up to 30 ft.

CLEANING: Fill the bottle with water, set dial to 10, and spray until empty.
