

# Assembly Instructions for All Beetle Trap

IL-2800 – With SPB Lure

<p>1) Pull the protective paper off of the sticky glue pad located inside the tray.</p>	 <p><b>1</b></p>
<p>2) Flip the blue base/clear cover upside-down and press the underside of the tray with the exposed glue board down firmly until it snaps into place. <i>You should be able to hear it snap into place on both ends of the tray.</i></p>	 <p><b>2</b></p>
<p>3) Remove the clear top from the blue trap base by gently lifting from the anchor point.</p> 	 <p><b>3</b></p>
<p>4) Remove the SPB pheromone lure from the packet and place it in the center of the glue board.</p>	 <p><b>4</b></p>
<p>5) Snap the clear top back onto the blue trap base and place the trap on a flat surface where insect activity is suspected. <i>Anchor the trap to equipment, walls or floor when necessary.</i></p>	 <p><b>5</b></p>

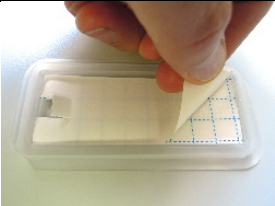

6) Inspect the trap regularly. Add a new pheromone lure **every 30 days**. Replace the glue board when it becomes more than 50% full of insects or debris as this may inhibit capture.

# All Beetle Trap IL-2800 – With SPB Lure
