

DeTour^{FOR}Rodents

A Bio-Repellent by PiGNX 

Application for Squirrels

As simple as a tray of
Sunflower Seeds

A tube of DeTour

Place a thick bead of DeTour around
the tray. We are using plastic here as
a base to prevent the DeTour from
soaking into the concrete.

Squirrels are highly attracted to
Sunflower seeds and are very
sensitive to DeTour. Once squirrels
come in contact with the DeTour
they will typically vacate the area.
