

Open Trap

Add bait & soapy water

Place Trap

EASY INSTRUCTIONS

Open traps and bait with fish oil, castor oil, soya sauce or ripe fruit. Place a small amount of soapy water in the bottom of the trap.

Earwigs will be attracted to the bait, fall into the water and drown. Place traps in gardens with rich soil on southern slopes, under shrubberies, along fences, in woodpiles and the base of trees. Wash out traps with warm soapy water before rebaiting and reusing. Do not place traps in dishwashers.
