

# GNAT STIX™

FOR GNATS AND OTHER SMALL BUGS ON HOUSE PLANTS

Use for non-toxic control of fungus gnats, aphids, plant lice and other small insects infesting house plants. The insects are attracted to the bright yellow sticky traps, where they meet a sticky end. Effective for even the worst infestations of fungus gnats. Use one Gnat Stix for each infested plant and for all other plants in the same room and in nearby rooms.

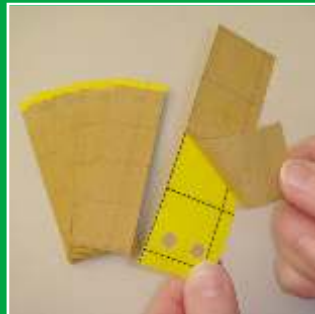

AVOID TOUCHING LEAVES WITH THE STICKY PAPER. IN CASE OF CONTACT, GLUE CAN BE REMOVED WITH VEGETABLE OIL.

## EASY INSTRUCTIONS

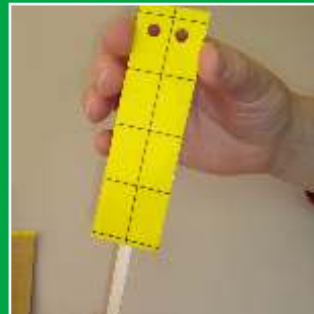

Peel the release paper from the traps. Attach to wooden stakes provided. Use one sticky strip for each wooden stake. Place traps where insects have been seen. Replace traps when full of insects or every 3 months. Dispose of old traps in regular trash or place in compost bin.
