

Sublime™

HERBICIDE

Control of Dutch clover in cool season turf

Dr. Shawn Askew, Virginia Tech

Trial Objective

- To determine the efficacy of Sublime™ for controlling Dutch clover (*Trifolium repens*) in cool season turf height lawns.

Materials and Methods

- Trial was initiated on August 13, 2020, through November 5, 2020, and was conducted at the Turfgrass Research Center (Blacksburg, VA).
- The plots were laid four replications on cool season blend turfgrass.

- % Control of Dutch clover was recorded in each plot (0 = no control of broadleaf, 100 = complete control).

Trial Results and Conclusions

- Sublime provided the highest level of control against other herbicides.
- This unique combination works quickly with no bleaching.

% Control of Dutch Clover (Virginia Tech 2020)
