

**They say many
hands make light work.**

**What they don't say is
how much a bunch of
hands goes for
these days.**

Fact is, hand-weeding can strangle your profits in no time. Maybe that's why so many nursery operators are opting for the proven, long-lasting weed control of Gallery* specialty herbicide. Gallery effectively controls 95 species of broadleaf weeds for up to eight months. Gallery can be used on 440 field-grown and 230 container-grown ornamentals, and can also be applied in an over-the-top application on more than 400 ornamentals. Read through the information on the back of this sheet to find out how you can take a hands-off approach to weed control this year with Gallery.

Saves on Labor Costs.

Specialty Herbicide

ONLY GALLERY TACKLES 95 TOUGH BROADLEAF WEEDS FOR UP TO 8 MONTHS.

If you'd like to keep a tighter rein on expenses this year, then hand-weeding is simply not an option. We have a better way for you to prevent tough broadleaf weeds from gaining a stranglehold on your ornamentals: an economical application of Gallery* specialty herbicide.

Gallery is the only sprayable preemergence herbicide that controls 95 species of broadleaf weeds – including dandelion – for up to eight months. And Gallery can be used on 440 field-grown and 230 container-grown ornamentals – including nursery stock.

GALLERY WIPES OUT YOUR TOUGHEST BROADLEAF WEED PROBLEMS.

Just one application of Gallery will provide up to eight months of control of 95 quality-robbing broadleaf weed species, including:

- Bittercress
- Black medic
- Carolina geranium
- Chickweed
- Clover
- Dandelion
- Filaree
- Henbit
- Kochia
- Lambsquarters

- Little mallow
- Morningglory
- Mustard
- Oxalis
- Pennywort
- Pigweed
- Pineappleweed
- Plantain
- Prostrate knotweed
- Purslane
- Russian thistle
- Speedwell
- Spurge
- Thistle

GALLERY STOPS WEEDS BEFORE THEY GET STARTED.

All it takes to activate Gallery herbicide is at least 1/2 inch of rainfall. That sets up a solid control area around weed seedlings. As weed seeds germinate, Gallery disrupts and halts root and stem development of the weeds, so seedlings gradually die before they ever break the soil surface.

Gallery stops weeds early, so you don't have to spend all season chasing them down with costly hand-weeding or postemergence herbicide applications. Plus, as tough as Gallery is on broadleaf weeds, you don't have to worry about phytotoxicity reducing the quality of your ornamentals.

GALLERY GIVES YOU GREATER FLEXIBILITY.

Gallery may be tank-mixed with Surflan* herbicide for broad-spectrum weed control. You can also tank-mix Gallery herbicide with many other labeled herbicides, fungicides and insecticides to provide maximum pest control.¹

Gallery herbicide is available in a number of leading fertilizers to provide broadleaf weed control and fertility in one convenient application.

PART OF THE DOW AGROSCIENCES FAMILY OF TURF AND ORNAMENTAL PRODUCTS.

Gallery is one of many outstanding turf and ornamental products available from Dow AgroSciences. If you'd like more information about any of them, contact your authorized Dow AgroSciences distributor today.
