

STROBE® PRO G

Granular Fungicide

Packaging 30 Pound Bag

Features & Benefits

- All markets can easily use Strobe® Pro G without making a complete tank mix.
- LCO's can treat localized portions of a home lawn.
- Smaller sport turf facilities that do not have large spray equipment, now have an affordable means to treat most common turf diseases.
- Golf courses can treat individual greens when the spray equipment is being used for other applications.

Proven Performance

Strobe Pro G fungicide provides the same long-lasting, broad-spectrum disease control as Strobe Pro fungicide, only now in granular form. Strobe Pro G is a combination of two broad spectrum, preventative and curative fungicides with systemic properties for the control of many important turfgrass diseases. Strobe Pro G may be applied by drop or rotary broadcast granular spreaders.

Formulation

Granular herbicide, AI: 0.31% Azoxystrobin, 0.75% Propiconazole

Effective Against

Foliar, stem and root diseases such as leaf and stem blights, dollar spot, leaf spots, patch diseases, anthracnose, fairy rings, mildews, molds and rusts of turfgrass

QUALI-PRO

IN PRACTICE

Use Sites

Golf courses, lawns and landscape areas around residential, institutional, public, commercial and industrial buildings, parks, recreational areas and athletic fields

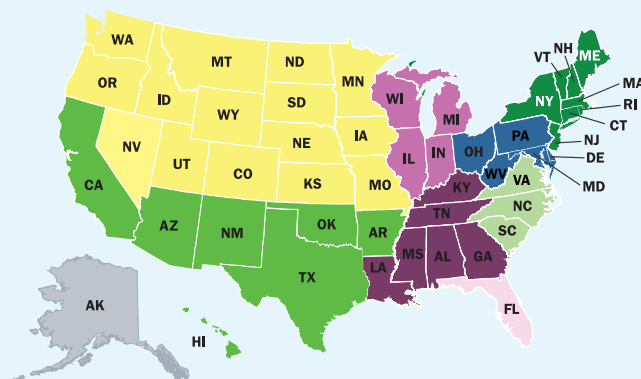

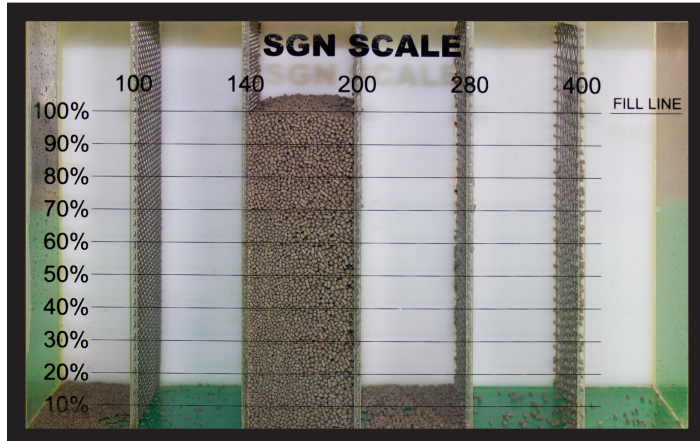

Mode of Action

Azoxystrobin is a Group 11 fungicide. This family of actives interferes with the normal respiration of the fungus. Respiration is when the cell burns energy to do normal functions.

Propiconazole is a Group 3 fungicide. This family are known as DMI's and prevent the cell membrane from forming.

Uniform Application

Strobe Pro G is carried on a technologically advanced carrier: 140 SGN Verge. Its uniform size, shape, and density make it easy to spread while still providing great coverage and dispersion.
