

DOMINANT[®] 1%

Liquid Ant Bait

DominAnt 1% is your solution to large ant colonies. DominAnt 1% is a borax-based 1% active liquid ant bait. It is very attractive to Argentine ants and other sweet feeding ants. As social insects, ants take DominAnt 1% back to the nest and feed the colony, killing the entire colony, including any queens.

DominAnt 1% is specifically formulated for very large or multi-queen ant colonies. The lower active ingredient coupled with the full strength attractants of regular DominAnt helps spread the bait throughout the larger colonies, allowing for greater consumption.

DominAnt 1% can be applied from quart containers into bait stations designed to hold liquid ant bait products.

- Listed for crazy, Argentine, little black, pavement, odorous house, cornfield, acrobat, white-footed, big-headed and ghost ants.
- Uses the same full strength attractants as regular DominAnt - it's not a "diluted" DominAnt.
- Use both indoors and outdoors.
