

Blindside
HERBICIDE

Launch A Surprise Attack Against Even The Toughest Weeds

- ◆ Blindside delivers:
 - ◇ Post-emergent control of broadleaf weeds—including tough weeds like **dollarweed, doveweed, buttonweed, and wild violet**—and **perennial sedges like yellow nutsedge and green kyllinga**
 - ◇ Fast-acting, visible results within a few days
⇒ *Celsius™ WG*: Visible results and control may take several weeks
 - ◇ Approved for use on most warm season turf, including St. Augustinegrass, Bermudagrass, Centipedegrass, and Zoysiagrass. Also labeled for use on Kentucky Bluegrass & Tall Fescue for transition zone flexibility
 - ◇ A dual action, optimized combination of active ingredients that works through both foliar contact & root uptake
 - ◇ Protect your “blindside” next season through control of the underground reproductive structures for reduced weed populations in the future

		Blindside®	Celsius™ WG
Active Ingredient		Sulfentrazone, Metsulfuron-Methyl	Iodosulfuron, Thiencarbazone, Dicamba
Max Rate/ season		10 oz per season	7.4 oz per season
