To Whom It May Concern:

RE: Pure Drain Defender

My name is Dennis Stabile. I am the owner/operator of eight McDonald's restaurants in the Chicago area.

Most restaurants like mine have problems with fruit flies year round. We have tried many remedies and spent a lot of money over the years to solve this problem, but they never go away. When a friend told me about the new Pure Drain Defender product line, I agreed to have them tested in my stores, even though I was skeptical. Nothing had really worked before.

The Pure Drain Defender products were tested in two of my stores for 60 days. I was surprised when even after the first few days of testing, we noticed a striking improvement to our drain system, our floors never looked better and after a week the fruit flies were completely gone.

The products are easy to use and are incorporated into our routine closing procedures. We don't have to worry about employees handling hazardous chemicals anymore.

The Pure Drain Defender product line has proven to be effective at all my McDonald's stores and I highly recommend it for your operation.

Sincerely,

Dennis Stabile
McDonald's Owner/Operator
