

SpeedZone[®] SOUTHERN BROADLEAF HERBICIDE FOR TURF

Fast broadleaf weed control – developed for southern grasses

SpeedZone[®] Southern Broadleaf Herbicide for Turf provides exceptional and fast broadleaf weed control in sensitive southern turfgrasses. In university and cooperator tests, applications have repeatedly controlled tough weeds like dollarweed, creeping beggarweed, clover, plantain, ground ivy and spurge with a fast-acting response with visible activity within hours.

SpeedZone Southern contains an advanced chemistry for broadleaf weed control in turf. The mode of action inhibits a key enzyme in chlorophyll production. This causes cell membranes to rupture and rapidly disintegrate within hours. Weed death can occur within 7 to 14 days.

SpeedZone Southern opens up more application opportunities than most herbicide products. This product excels by controlling some of the toughest weeds. Rain-fast in as little as three hours, there is less concern about weather interference. With SpeedZone Southern you can reseed in one week.

A low-odor formulation, SpeedZone Southern can be applied without raising unnecessary concerns over pesticide applications.

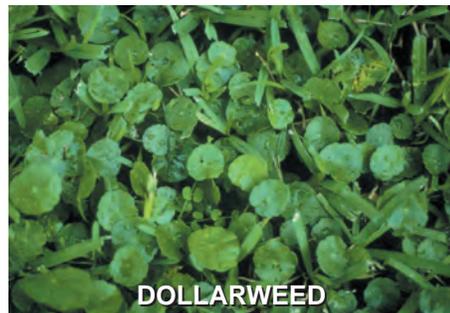

SpeedZone Southern is highly selective in most established warm-season and cool-season turfgrasses. Species include: common and hybrid bermudagrass, zoysiagrass, bahiagrass, common St. Augustinegrass¹, buffalograss, centipedegrass, seashore paspalum and cool-season turfgrasses. SpeedZone Southern has a CAUTION signal word and good toxicological, environmental and ecological properties compared to standard herbicides.

When you use SpeedZone Southern, your clients will see the fast results within days, thus reducing the number of call backs.

DOLLARWEED

CREeping BEGGARWEED

- **Fast weed control**
- **Advanced broadleaf weed control chemistry for turf**
- **Visible injury in hours**
- **Effective, fast-acting product for hard-to-kill weeds**

- **Weed control in as little as 1-week**
- **Rain-fast in 3 hours**
- **Reseed in 1-week**
- **CAUTION signal word**
- **Low-odor formulation**

RECOMMENDATIONS

Post-emergence broadleaf weed control in ornamental turf, golf courses, lawns, sod farms, roadsides, cemeteries, sports turf and parks, especially where rapid visual results are an advantage.

ACTIVE INGREDIENTS:

Carfentrazone-ethyl*	0.54%
2,4-D, 2-ethylhexyl ester	10.49%
Mecoprop-p acid	2.66%
Dicamba acid	0.67%
Inert Ingredients	85.64%

*Carfentrazone-ethyl is a protox inhibitor, inhibiting a key enzyme in chlorophyll production which causes a disruption of plant cell membranes. Carfentrazone-ethyl is classified by the EPA as reduced risk chemistry.

EPA Reg. No. 2217-835

PACKAGING:

4 X 1 gallon per case:	
shipping weight	34 lbs.
2 X 2.5 gallons per case:	
shipping weight	42 lbs.
30-gallon drum: shipping weight	298 lbs.
