

INJECTABLE DIFFUSIBLE BORACIDE

40% Active Borate Gel Diffuses Deep Into Wood

JECTA® Diffusible Boracide can be injected through any wood surface coating. Inject into voids, checks, cracks or pre-drilled holes. It can be used in conjunction with BORA-CARE® or Tim-bor® treatments.

Allows Access to Painted, Stained or Sealed Wood

Use JECTA for hard-to-reach areas including:

- Flooring and Foundation Systems
- Window and Door Framing and Headers
- Exterior Steps, Porches and Decks
- Roof Trim and Soffits
- Infested or Susceptible Support Beams
- Porches and Garages
- Fence Posts, Pilings and Piers
- Log Construction
- Utility Poles
- Railroad Ties (Sleepers)

JECTA Has NO Known Resistance

JECTA will eliminate existing infestations and provide residual protection against:

- Subterranean Termites
- Formosan Termites
- Dampwood Termites
- Drywood Termites
- Carpenter Ants
- Old House Borers
- Longhorn Beetles
- Brown Rot, White Rot and Wood Decay
