

Invict Xpress Granular Bait - Quick Start Guide

Outdoor Applications

- Perimeter: 0.5-1 oz per 100 sq ft. Apply a 1-3 ft band around buildings. If using repellent sprays, bait outside treated areas.
- Turf: 4-8 oz per 1,000 sq ft. Spread evenly, do not water in.
- Sewers: 1 oz per 100 sq ft along ledges and manholes.
- Other Areas: Sidewalks, patios, driveways, mulch beds, gardens, wood piles, and trash areas.
- Greenhouses: Apply under benches only.
- Ant Mounds: 0.5-1 oz around trails and nests. Reapply after one week if needed.

Indoor Applications

- Use 0.5 oz per void, crack, crevice, or 100 sq ft.
- Apply in trash closets, drop ceilings, behind appliances, wall voids, around drains, and electrical conduits.
- Use tamper-resistant bait stations in accessible areas.
- Reapply after one week if pests remain.

Prevention Treatment

- Reapply Invict Xpress every 3 months around perimeters and harborages.
- Use non-repellent sprays like Taurus SC or Dominion 2L for best results before baiting.
