

WASP-FREEZE

Prescription Treatment® brand Wasp-Freeze® Wasp & Hornet Killer produces an instant knockdown and kills insects on contact from 15 feet away. It can be used safely around electrical with breakdown up to 49,300 volts and no arcing at 35,000 volts. Wasp-Freeze contains no ozone depleting substances.

Labeled for Use

Outdoors on a variety of flying insects including bees, wasps, hornets and yellowjackets. Wasp-Freeze is also labeled for spiders.

The Active Ingredients, d-trans Allethrin and Phenothrin

provide rapid knockdown and good residual control in the nest.

Operational Benefits

This wasp and hornet formulation provides instant knockdown upon contact. The knockdown is so quick, no stinging pheromone is released, thus reducing the chance of getting stung.

Product Specifications

Active Ingredients

Common Name: d-trans Allethrin and Phenothrin
Insecticide Class: Pyrethroid
MOA Group: 3
Sodium Channel Modulators

EPA Reg. No: 499-362

Signal Word: CAUTION

REI: None

Applicator PPE

Chemical resistant gloves
Safety glasses recommended

Size : 12x17.5 oz.
